Intumescent Paint Solutions

## Trinity Catholic College - Goulburn, NSW

Ornate fibrous plaster and pressed metal ceilings restored to original condition.

**Fire Rating: 90/90/90**

## Officers' Quarters Victoria Barracks Sydney

Constructed of Hawkesbury sandstone and originally completed in 1842. The CAP508 system was used to achieve fire ratings of 90/90/90 on original pressed metal and fibrous plaster ceilings.

**Fire Rating: 90/90/90 and RISF of 60 minutes**

### 70 King Street Project Sydney

Original heritage listed lath and plaster ceilings were restored and retained. The system was top coated with heritage white and ornate lattice work was detailed in gold to restore the ceiling to its original colours.

**Fire Rating: 90/90/90**

### Heritage apartments Sydney

Ornate fibrous plaster ceilings retained. Topcoated to match architectural requirements.

**Fire Rating: 90/90/90**

### Heritage boat shed in Lavender Bay Sydney

Timber beams and the exposed underside of the timber floor coated with the CAP508 system to achieve an FRL of 60/60/60 as part of an alternative solution.

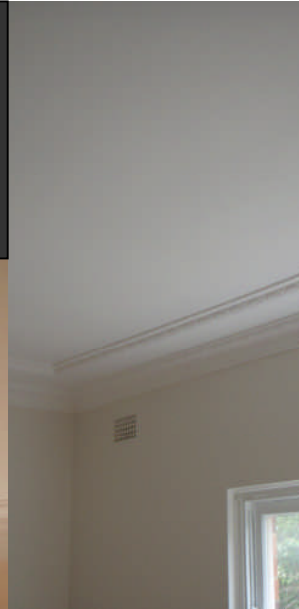

**Fire Rating: 60/60/60**

**Multi-storied apartment building North Sydney**

Fibrous plaster and lath and plaster ceilings were retained as an alternative to replacing with fire rated linings.

**Fire Rating: 90/90/90 and RISF of 60 minutes**

**Eagle Boys pizza shop Sydney**

Plasterboard ceilings were able to be retained with a high level of finish achieved throughout the shop, all ceilings were fire rated in a 3 day turn around.

**Fire Rating 60/60/60**

- Australian testing to AS1530.4
- Recognised applicators
- Applicator certification
- High level of finish achieved
- Water based low VOC systems
- CAPMark RFID onsite tagging system and associated database
